

Task	Classification	Reason
Study ML concepts	Collaborate with AI	AI explains concepts but I verify understanding myself.
Python coding	Collaborate with AI	AI helps write code, I debug and test it.
Debug code	Delegate to AI with review	AI finds possible errors, I verify the solution.
Write GitHub README	Delegate to AI with review	AI improves formatting and grammar.
Build React projects	Collaborate with AI	AI suggests code, I integrate and test it.
Internship assignments	Collaborate with AI	AI helps organize answers, I complete and review them.
Resume updates	Delegate to AI with review	AI improves wording but I verify details.
LinkedIn posts	Fully automate	AI can generate draft posts quickly.
Email writing	Fully automate	AI creates professional email drafts.
Weekly planning	Delegate to AI with review	AI creates schedule which I adjust.
Career decisions	Just Me	Personal decisions should be mine.
Placement interview	Just Me	Final interview performance depends on me.

Target Task	Success Definition ("Done Well")
Debug Python Code	The bug is identified correctly, the code runs without errors, and I understand why the solution works before using it.
Write GitHub README	The README clearly explains the project, includes installation and usage instructions, and is easy for others to understand.
Study ML Concepts	I can explain the concept in my own words, solve at least one related problem, and apply it in a small practical project.
